

Business Networking

Team HighFive

Many young entrepreneurs and students have successful business models that they wish to start. However, they lack the financial means to start over or they are simply in need for a partnership with some other skill set. It has always been a challenge to find a platform dedicated to the needs of young entrepreneurs and future leaders. This problem space forms the basis of our platform - Business Networking.

The idea is to create a platform that connects business enthusiasts, investors and a diverse set of skilled people together on one platform. Users are able to create searchable profiles, identify their interests using unique hashtags and search potential partners using the skill matchmaking.

The process is simple. After signing up, you may access the dedicated forums to discuss your brief ideas and concerns with other likeminded people. You can also directly engage in private conversations with fellow community members, or use the skill search to contact potential partners. The ultimate goal is to become the co-founders of a new business enterprise. If you are an investor, you can list up your business and the required skillsets or investments. Alternatively, you may sign up as a 'skilled' person with in-demand skills and ready to contribute in the manner described by investors.

Business Networking equips its users with the necessary capabilities to form a mutual partnership a reality. The website offers private inbox, discussion forums, skill search, audio/video comms, investor and skilled-based listings and much more!

Please obtain our brochure for further information about the features and a guided tour of the website.
