   Cell Phone.
4) What's your hobby?
   Reading books.
5) The last time when u have any new ideas about your own business, start-up, for example, how will u start this?
   I will do some market research first, then, start to design the concept.
6) How will u find a partner when u want to start a new business or have any new ideas.
   Ask for the student I knew, teacher and friends.
7) What's your opinion when if you post any ideas on the internet about your business?
   No, I don't want to post my ideas on line.
8) Can I know the reason?
   On the internet is hard to find this. And got a lot of problems.
9)What method do u think its safe to post your ideas.
   Make a post with the information about the person you want. The post can have small amount of information with idea. If can have an private interview or meet will be better.
10) How will you trust the person that u find online? And How will you trust the person that have the skills u want.

Do not trust the person online unless have verified. Show their own documents at meeting.

11) What 's your opinions If by searching the profiles online to find the person u want?

This way is better but still not good enough. You need spend more time to search.

12) Is there anything you'd like to add or ask ?

So far no.

The Second example

Interview summary

The second interviewer is not in the totally opposition part for this idea. This Interviewer would develop online but also make protection for his own idea.

Interview question with answer

1) What's your occupation? what do you do all day?

Co-founder at Life Glass Pty Ltd (www.lifeglass.com.au)

2) How will u connect to internet? how often do you use the internet? Which device do you think is most convenient way to use internet?

As a technology startup, everything we do is web based. We use internet daily on both mobile and desktop devices.

3) What's your hobby?

I have always been interested in computer & technology. So I guess my work is my hobby.

4) The last time when u have any new ideas about your own business, start-up, for example, how will u start this?

We had the idea for Life Glass a couple of years ago, at that time we thought the idea would be cool but technology probably wasn't there then. I had a meeting with a friend of mine early this year and he showed me some advances in smart glass technology and we felt it's now the time to introduce this kind of product. So we set up a company straight away and registered the patent.

5) How will u find a partner when u want to start a new business or have any new ideas.

I think as a startup, you want the co-founders to compliment each other. So I think a tech person and a salesperson is a good combination.

6) What's your opinion when if you post any ideas on the internet about your business?

I think it's a critical part of the business life cycle. I would develop the idea a bit and make sure our IP is protected before getting feedback on the idea.

7) Can I know the reason?

I think it's important to validate your idea is actually good and also internet allows you to reach a vast market faster and cheaper than traditional means.

8)What is your opinion when u forming partnerships online when sharing your ideas?

The founders need to believe in the idea and you need to know they can commit to the project, so I think it's difficult to do it once the idea is set.

9)What's your ideas to improve this problem?

I think there need to be network sessions/meetups so you can connect to like minded people, develop the rapport first then see if anything can happen after that.

10) What method do u think its safe to post your ideas.

I think social media probably gets you the most media attention straight away.

11) How will you trust the person that u find online? And How will you trust the person that have the skills u want.

Very hard. I would set some challenges in addition to interviews.

12) What 's your opinions If by searching the profiles online to find the person u want?

I think it's difficult to find a suitable person that way.

13) Is there anything you'd like to add or ask ?

No.

All the interview have recorded which get permission from the interviewer.*
