User interface testing for DECO3500

This user testing exercise is for <u>educational purposes only</u>.

You will be asked to interact with a paper prototype, computer program or system, and/or to answer questions about your interaction. We are testing the design; we are <u>not testing you</u> in any way. The test will require no more than an hour of your time, and potentially less.

Consent is <u>voluntary</u> – you do not have to participate if you don't want to. If you do participate, you may withdraw your consent at any point, and all your data up to that point will be destroyed and not used.

All data collected is <u>confidential</u> and will be kept in a secure location, and your data will be indexed by a participant ID rather than by name.

If AV recordings are taken, they will be seen only by the students doing this particular project and possibly also by your practical tutors and the course coordinator.

There is no reimbursement or payment for participation.

I have read the information above and give my consent to participate.
